March 14, 2008

Subject

Construction changes

memorandum

Mercy San Juan is in the beginning stages of construction for its new employee parking structure and six-story patient care wing. Starting the week of July 2, there will be key changes to the traffic flow and parking areas on campus that may have an impact on you. During this time, extensive signage will be posted throughout the campus to assist you with these changes. While the following areas are under construction, please continue to park in the existing parking structure or in one of the appropriate surface lots.

- The exit-only driveway adjacent to the Mercy Medical Group building (6555 Coyle Ave.) will become a two-way driveway that will provide a new route to the main entrance of the medical center.
- The driveway and walkway adjacent to the CCU/Telemetry building will be closed.
- The three physician and two handicap parking spaces outside the Outpatient entrance will be closed.

Watch for more updates in *Inside Mercy*. Information will also be posted at mercysanjuan.org. For other construction-related questions, call the Construction Hotline at 537-5243.

If you are interested in carpooling or exploring other commute options during construction, please contact Employee Transportation and Parking Coordinator Bill Atwell at 537-5330.
